Because every business is different

You can be heard

*Need something?
We can turn on
features as you need
them, or take
requests for new features.*

You can be unique

*Tailored for your Business,
Your Pomodo Cloud puts
the power in your hands.
Configuration, Options,
and user Customization
are already built in.*

You can integrate

*Your Pomodo Cloud can
integrate with shipping services,
accounting programs,
ecommerce solutions,
and more!*

You can grow

*Your Pomodo Cloud is
affordable. You will only pay
for what you need and as
your needs grow, the software
can grow with you.*

Pomodo Modules and Features

Point of Sale

Process pick up sales or phone orders for wholesale along with managing your retail storefront with Pomodo's desktop POS. Easily ring up customers and manage day to day sales activity.

Order Management

Efficiently manage all your orders in one convenient location on the cloud. Create orders, back orders, and quotes and email them from anywhere using our order module.

Mobile Sales

Sales Reps can easily process orders when they are out and about and send them in to fulfill. Don't keep your customers waiting. Get their orders in right away!

Customer Management

Maintain customer information to use as a valuable marketing tool. Our CRM allows you to track all customer information including order history.

Accounts Receivable

Control Business to Business accounts: Keep track of customer balances, late fees, and statements using the Pomodo AR.

Multiple Locations

If you have multiple locations and want to be able to manage all of them in one place look no further than Pomodo's HQ module to tie everything together!

User Management

Full user permissions and user roles for employee management. Manage what employees can see and do, and keep track of their hours with our Time Clock.

Purchasing & Procurement

Use our Purchase Order Module to create orders and email them to your vendors. Ensure that your orders are accurate and timely, while maintaining a history with your vendors.

Inventory Management

Count, track, and manage everything you need to know about your inventory. Know what you have and what you need using our email low stock feature, so that you can accurately plan ahead.

Pick, Pack, Ship

Using the Pomodo Shipping Bump Bar, collect your orders from all channels and manage your pick, pack, and ship process.

E-Commerce

Easily download orders and manage products across all platforms to keep your inventory levels accurate with our e-commerce integration.

Accounting Integration

Save a step by setting up our accounting export to easily export information from Pomodo to an import file for your Accounting.

Credit Card Processing

Securely process credit cards through our integrated solutions. In the cloud, and at the POS, we have you covered! We also support gift cards and mobile store cards.

Custom Software

We provide custom software development for any features unique or specific to your needs.

Hardware

Pomodo carries a full suite of hardware to seamlessly work with your Pomodo Software.
